Professional Summary

Motivated and detail-oriented Computer Science undergraduate with practical experience in frontend web development and project implementation. Proficient in HTML, CSS, JavaScript, and responsive design, demonstrated through hands-on projects. Committed to continuous learning and innovation, eager to contribute technical expertise and creativity in a forward-thinking organization.

Education

- **Galgotias University** 2021-2025
B.Tech. (CSE)
8.3 CGPA
- **CBSE** 2020
Intermediate

Projects

- **News Portal**
Developed an innovative news portal utilizing advanced Machine Learning techniques with XAMP. This project involved creating a dynamic platform that aggregates and curates news articles based on user preferences and trending topics. Key features include real-time article classification, personalized content recommendations, and sentiment analysis to ensure a comprehensive and engaging user experience.
- **Tesla Stock Prediction**
Developed a predictive model to forecast Tesla stock prices using advanced Machine Learning techniques. This project involved data collection, pre-processing, feature engineering, and implementing models such as Linear Regression, LSTM, and Random Forest. Achieved high accuracy in predicting stock trends, providing valuable insights for potential investors and analysts

Skills

- Technical Skills Languages: HTML, CSS, JavaScript, Java
- Personal Skills: Teamwork, Leadership, Adaptability

Certification

- Palo Alto Fundamentals Of Network Security
- Palo Alto Fundamentals of Cloud Security
- Palo Alto Fundamentals of Cyber Security

Achievements & Awards

- Successfully developed a machine-learning model to predict Tesla's stock prices using historical data. The project demonstrated strong analytical and programming skills, and received positive feedback from mentors for its accuracy and innovative approach.
